Reserve funds

Holding today's deposits, closing every gap costs \$156,869 a year — 6% on top of the \$2,702,660 the Town already puts in, and 5 of 12 funds dip below zero inside the window. All of it falls on Property taxes.

Debt service

PRINCIPAL

\$52M

INTEREST

\$25M

PEAK SERVICE

\$3.9M

FY2038

New borrowing only. No schedule of existing outstanding debt has been loaded, so these totals understate by exactly the Town's current debt service.

What it costs a taxpayer

Tax-supported capital cost is **reserve deposits plus debt service plus pay-as-you-go**. Never gross outlay: a withdrawal from a reserve fund does not raise the tax rate in the year of withdrawal — the deposit did, in an earlier year. Deposits below are what the funds require to stay solvent, not what is budgeted today.

YEAR	DEPOSITS	DEBT SERVICE	PAY-AS-YOU-GO	TOTAL	RATE /\$1,000

What is still open in the data

Stated rather than buried. Every check runs against the rows in this plan.

FINDING	ROWS	AMOUNT
Classifications have been confirmed Importance, timing and type are proposed by rule until somebody signs off. Until then no chart built on them states a fact.	166	\$83,311,797
Every project says how far it can move Earliest and latest year. Without them the scenario engine cannot move anything, and the affordability question cannot be answered.	166	\$83,311,797
Funding source and set of books agree A source belongs to one set of books or the accounting is wrong. Where the project says one thing and its source another, one of them is a typo.	157	\$43,620,975
Every project has a division Division answers who operates the asset and will do the work. Blank rows drop out of every division cut.	24	\$21,845,335
Every project names its set of books The money axis is entity then source. A project with no entity files as Not stated and its totals land nowhere.	1	\$20,000,000
Every project names a funding source An unidentified source is an honest answer and a real number. It is counted here so it cannot disappear into a summary.	6	\$19,453,322
Nothing is flagged as needing a check Rows the register itself marks for verification.	12	\$2,612,936

FINDING	ROWS	AMOUNT
Every project has a department A project with no department cannot be defended at a budget hearing, and does not reconcile against a cost center.	2	\$1,003,322
Every project has a cost A project with no cost is invisible in every total but still occupies a year.	1	—

Assumptions in force. Cost index 4.0% · bond 4.00% over 20 years · contributions adopted, held flat · reserve interest 0.0% · no assessed valuation loaded, so nothing converts to a tax rate · no existing debt loaded, so debt-service totals understate
Tax-supported cost means reserve deposits plus debt service plus pay-as-you-go, never gross outlay. Generated August 22, 2026 from the Town of Hanover capital plan.
